

Lesson 2 FAQs

Q: I'm having trouble getting my program to compile, and I don't understand the error messages. I'd like to post my code in the Discussion Area for all to see. How do I do this?

A: In the program text editor, use CTRL + A (hold down the CTRL key and press A) or COMMAND + A on a Mac to select the entire program. Then use CTRL + C (COMMAND + C on a Mac) to copy it, or select **Copy** from the **Edit** menu.

Now start a new message in the Discussion Area. Fill in the form as usual, but when you get to the comments box, explain your problem, and then click your browser's **Edit** menu and choose **Paste** (or use CTRL + V in Windows or COMMAND + V on a Mac to paste the program into the message).
